About me

I am a Junior Web-Developer, as a someone who have graduated from Vocational Highschool with a Software Engineering Major and also a year experience as a Programmer in several company. I still have a lot to learn, currently I am a Freelance Programmer looking for another chance where I can learn and gain experience. I know myself and I have some skill at some of Programming Language (Laravel, Javascript, ReactJS, VueJS). So I am looking forward for another chance. I have great interest when it comes to website making. I speak English fluently, and I am an optimistic individual.

Experience

Front-End Developer

PT Nutrifood (October 2020 - Desember 2020)
- I was a Front-End Developer in this company. When i had an internship here, I made a website-based application, namely Energy Monitoring, which aims to monitor the Energy Consumption used by the company.

Project Manager

PT Kreasi Asia (August 2021 - January 2022)
- I was a freelancer at this company, as a Project Manager and a Frontend Developer.

Front-End Developer

XCIDIC (November 2021 - March 2022)
- I was a Front-End Developer in this company as an Internship total 4 months. It was really a great experience with great people, my head filled with a lot JavaScript.
